AFH Bogotá D.C. binds to the sandbox to participate in a comprehensive project that benefits a community group from the Emberá-Wounaan ethnic group belonging to low Baudó, displaced by the internal conflict and residing in Bogotá in Ciudad Bolívar.

Within the comprehensive project an architectural component is developed consisting in the improvement of housing in which they live, especially the improvement of the main dwelling in which they live more than 30 people of all ages in overcrowded conditions.

The architectural component is developed jointly between AFH Bogotá and Architects members of the sandbox.
